## St Mary's C.E. Primary School Calculation Policy

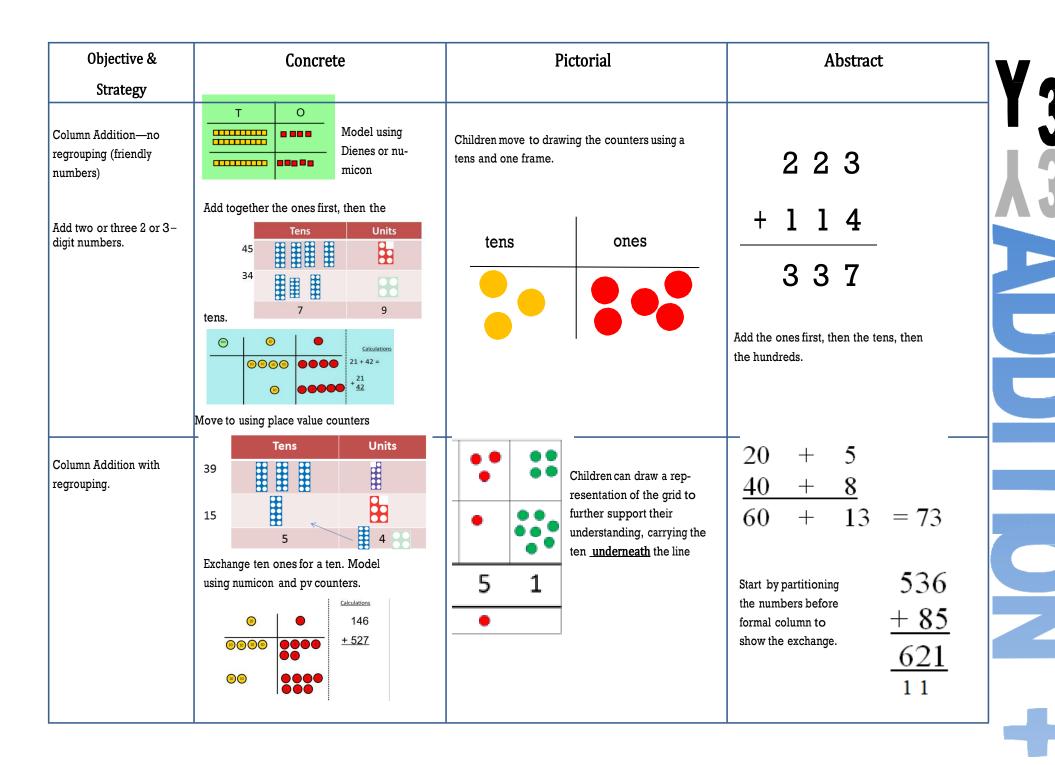

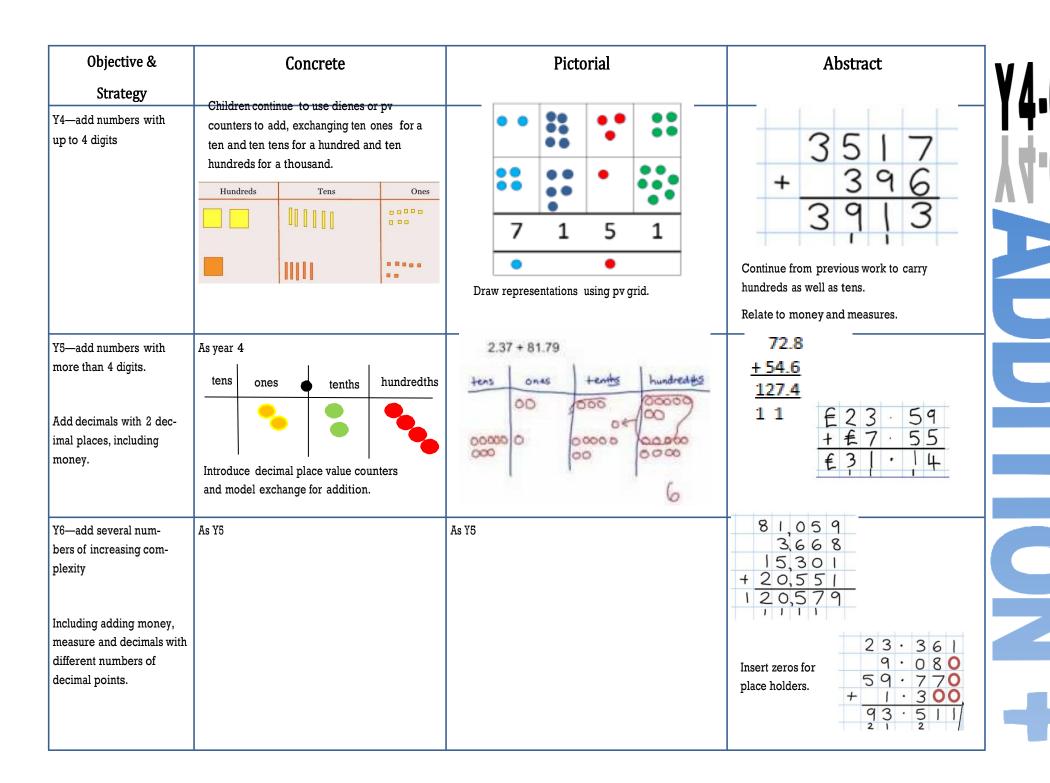

This policy has been adapted from the White Rose Maths Hub Calculation Policy with further material added. It is a working document and will be revised and amended as necessary.

Objective & Strategy	Concrete	Pictorial	Abstract
Combining two parts to make a whole: part— whole model	Use part part whole model.  Use cubes to add two numbers together as a group or in a bar.	Use pictures to add two numbers together as a group or in a bar.	4 + 3 = 7  Use the part-part whole diagram as shown above to move into the abstract.
Starting at the big- ger number and counting on	Start with the larger number on the bead string and then count on to the smaller num- ber 1 by 1 to find the answer.	12 +5 = 17  10 11 12 13 14 15 16 17 18 19 20  Start at the larger number on the number line and count on in ones or in one jump to find the answer.	5+12 = 17  Place the larger number in your head and count on the smaller number to find your answer.
Regrouping to make 10.  This is an essential skill for column addition later.	6 + 5 = 11  Start with the bigger number and use the smaller number to make 10.  Use ten frames.	Use pictures or a number line. Regroup or partition the smaller number using the part part whole model to make 10.  9 + 5 = 14	7 + 4= 11  If I am at seven, how many more do I need to make 10. How many more do I add on now?
Represent & use number bonds and related subtraction facts within 20	2 more than 5.	Draw 2 more hats  5 + 2 =	Emphasis should be on the language '1 more than 5 is equal to 6.' '2 more than 5 is 7.' '8 is 3 more than 5.'

Objective &	Concrete	Pictorial	Abstract	1/0
Strategy				<b>Y</b> 7
Adding multiples of ten	50= 30 = 20  Model using dienes and bead strings	3 tens + 5 tens =tens 30 + 50 = Use representations for base ten.	$20 + 30 = 50$ $70 = 50 + 20$ $40 + \Box = 60$	Y2
Use known number facts  Part part whole	Children explore ways of making numbers within 20	20	+ 1 = 16	
Using known facts		∴ + ∴ = ∴	3 + 4 = 7  leads to  30 + 40 = 70  leads to  300 + 400 = 700	
Bar model	3 + 4 = 7	7 + 3 = 10	23 25 ? 23 + 25 = 48	

Objective & Strategy	Concrete	Pictorial	Abstract
Add a two digit number and ones	Use ten frame to make 'magic ten  Children explore the pattern.  17 + 5 = 22  27 + 5 = 32	Use part part whole and number line to model.  17 + 5 = 22  3 2  16 + 7  16 20 23	17 + 5 = 22  Explore related facts  17 + 5 = 22  5 + 17 = 22  22—17 = 5  22—17 = 5
Add a 2 digit number and tens	25 + 10 = 35 Explore that the ones digit does not change	27 + 30 +10 +10 +10 	27 + 10 = 37 27 + 20 = 47 27 + \(\sigma\) = 57
Add two 2—digit numbers	Model using dienes , place value counters and numicon	Use number line and bridge ten using part whole if necessary.	25 + 47 $ 20 + 5 $ $ 40 + 7 $ $ 20 + 40 = 60 $ $ 5 + 7 = 12 $ $ 60 + 12 = 72$
Add three 1 – digit numbers	Combine to make 10 first if possible, or bridge 10 then add third digit	Regroup and draw representation.	4+7+6 = 10+7  = 17  Combine the two numbers that make/ bridge ten then add on the third.

Objective & Strategy	Concrete	Pictorial	Abstract
Taking away ones.	Use physical objects, counters, cubes etc to show how objects can be taken away.  6—4 = 2  4—2 = 2	$ \begin{array}{cccccccccccccccccccccccccccccccccccc$	7—4 = 3 16—9 = 7
Counting back	Move objects away from the group, counting backwards.  Move the beads along the bead string as you count backwards.	5 - 3 = 2 $0  1  2  3  4  5  6  7  8  9  10$ Count back in ones using a number line.	Put 13 in your head, count back 4. What number are you at?
Find the Difference	Compare objects and amounts  7 'Seven is 3 more than four'  4 'I am 2 years older than my sister'  5 Pencils  Lay objects to represent bar model.	Count on using a number line to find the difference.   +6  1 2 3 4 5 6 7 8 9 10 11 12	Hannah has 12 sweets and her sister has 5. How many more does Hannah have than her sister.?

Objective &	Concrete	Pictorial	Abstract
Strategy  Represent and use number bonds and related subtraction facts within 20  Part Part Whole model	Link to addition. Use PPW model to model the inverse.  If 10 is the whole and 6 is one of the arts, what s the other part?  10—6 = 4	Use pictorial representations to show the part.	Move to using numbers within the part whole model.  5
Make 10	Make 14 on the ten frame. Take 4 away to make ten, then take one more away so that you have taken 5.	13—7  13—7  13—7  13—7  13—8  Jump back 3 first, then another 4. Use ten as the stopping point.	16—8  How many do we take off first to get to 10? How many left to take off?
Bar model	5—2 = 3		8 2  10 = 8 + 2  10 = 2 + 8  10-2 = 8  10-8 = 2

Objective & Strategy	Concrete	Pictorial	Abstract
Regroup a ten into ten ones	Use a PV chart to show how to change a ten into ten ones, use the term 'take and make'	20 – 4 =	20—4 = 16
Partitioning to subtract without regrouping. 'Friendly numbers'	Use Dienes to show how to partition the number when subtracting without regroup-ing.	Children draw representations of Dienes and cross off. $ \begin{array}{cccccccccccccccccccccccccccccccccc$	43—21 = 22
Make ten strategy  Progression should be crossing one ten, crossing more than one ten, crossing the hundreds.	34—28 Use a bead bar or bead strings to model counting to next ten and the rest.	76 80 90 93 'counting on' to find 'difference'  Use a number line to count on to next ten and then the rest.	93—76 = 17

Objective & Strategy	Concrete	Pictorial	Abstract
Column subtraction without regrouping (friendly numbers)		Darw representations to support understanding	Subtract ones column then tens with no exchange.
Column subtraction with regrouping	Tens Units	45 -29 Tens   Ones	836-254=582  360 130 6  200 50 4  500 80 2  Begin by partitioning into pv columns
	Begin with base 10 or Numicon. Move to pv counters, modelling the exchange of a ten into tten ones. Use the phrase 'take and make' for exchange.	Children may draw base ten or PV counters and cross off.	7 28-582=146 Then move to formal method.  5 8 2 1 4 6

## SUBTRACTION 1

Objective & Strategy	Concrete	Pictorial	Abstract
Subtracting tens and ones Year 4 subtract with up to 4 digits. Introduce decimal subtraction through context of money	234 – 179  179  100  100  100  100  100  100	Children to draw pv counters and show their exchange—see Y3	2 X 5 4 - 1 5 6 2 1 1 9 2 Use the phrase 'take and make' for exchange
Year 5 — Subtract with at least 4 digits, including money and measures.  Subtract with decimal values, including mixtures of integers and decimals and aligning the decimal	As Year 4	Children to draw pv counters and show their exchange—see Y3	28,928  Use zeros for place-holders.  77,769.00  77,769
Year 6—Subtract with increasingly large and more complex numbers and decimal values.			" 8 10, 6 9 9 - 8 9 , 9 4 9 - 6 0, 7 5 0 " 10 '5 · 34 '1 9 kg - 3 6 · 0 8 0 kg - 6 9 · 3 3 9 kg

Objective & Strategy	Concrete	Pictorial	Abstract
Doubling	Use practical activities using manipultives including cubes and Numicon to demonstrate doubling  + = = = = = = = = = = = = = = = = = =	Double 4 is 8	Partition a number and then double each part before recombining it back together.  16 10 6 1x2 1 x2 20 + 12 = 32
Counting in multiples	Count the groups as children are skip counting, children may use their fingers as they are skip counting.	Children make representations to show counting in multiples.	Count in multiples of a number aloud. Write sequences with multiples of numbers.  2, 4, 6, 8, 10  5, 10, 15, 20, 25, 30
Making equal groups and counting the total	□ x = 8  Use manipulatives to create equal groups.	Draw to show 2 x 3 = 6  Draw and make representations	2 x 4 = 8

Objective & Strategy	Concrete	Pictorial	Abstract
Repeated addition	Use different objects to add equal groups	Use pictorial including number lines to solve prob:  There are 3 sweets in one bag.  How many sweets are in 5 bags altogether?  3+3+3+3+3  = 15	Write addition sentences to describe objects and pictures.
Understanding arrays	Use objects laid out in arrays to find the answers to 2 lots 5, 3 lots of 2 etc.	Draw representations of arrays to show understanding	3 x 2 = 6 2 x 5 = 10

Objective & Strategy	Concrete	Pictorial	Abstract
oubling	Model doubling using dienes and PV counters. $40 + 12 = 52$	Draw pictures and representations to show how to double numbers	Partition a number and then double each part before recombining it back together.  16 10 10 10 10 10 10 10 10 10 10 10 10 10
ounting in multi- les of 2, 3, 4, 5, 10 rom 0 repeated addition)	Count the groups as children are skip counting, children may use their fin- gers as they are skip counting. Use bar models.  5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 + 5 = 40	Number lines, counting sticks and bar models should be used to show representation of counting in multiples.  3 3 3 3 3	Count in multiples of a number aloud.  Write sequences with multiples of numbers.  0, 2, 4, 6, 8, 10  0, 3, 6, 9, 12, 15  0, 5, 10, 15, 20, 25, 30

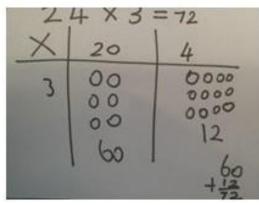

Objective & Strategy	Concrete	Pictorial	Abstract
Multiplication is commutative	Create arrays using counters and cu-bes and Numicon.  Pupils should understand that an array can represent different equations and that, as multiplication is commutative, the order of the multiplication does not affect the answer.	Use representations of arrays to show different calculations and explore commutativity.	12 = 3 × 4  12 = 4 × 3  Use an array to write multiplication sentences and reinforce repeated addition.  5 + 5 + 5 = 15  3 + 3 + 3 + 3 + 3 = 15  5 x 3 = 15  3 x 5 = 15
Using the Inverse This should be taught alongside division, so pupils learn how they work alongside each other.		X	$2 \times 4 = 8$ $4 \times 2 = 8$ $8 \div 2 = 4$ $8 \div 4 = 2$ $8 = 2 \times 4$ $8 = 4 \times 2$ $2 = 8 \div 4$ $4 = 8 \div 2$ Show all 8 related fact family sentences

## Objective & Concrete Strategy Grid method Show the links with arrays to first introduce the grid method. 4 rows of 10 4 rows Move onto base ten to move towards a more compact method. 4 rows of 13 Move on to place value counters to show how we are finding groups of a number. We are multiplying by 4 so we need 4 rows 100 Calculations 4 x 126 Fill each row with 126 Calculations 4 x 126 Add up each column, starting with the ones making any exchanges needed Then you have your answer.

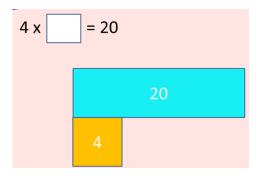

## **Pictorial**

Children can represent their work with place value counters in a way that they understand.

They can draw the counters using colours to show different amounts or just use the circles in the different columns to show their thinking as shown below.

Bar model are used to explore missing numbers

## Abstract

Start with multiplying by one digit numbers and showing the clear addition alongside the grid.

×	30	5
7	210	35

$$210 + 35 = 245$$

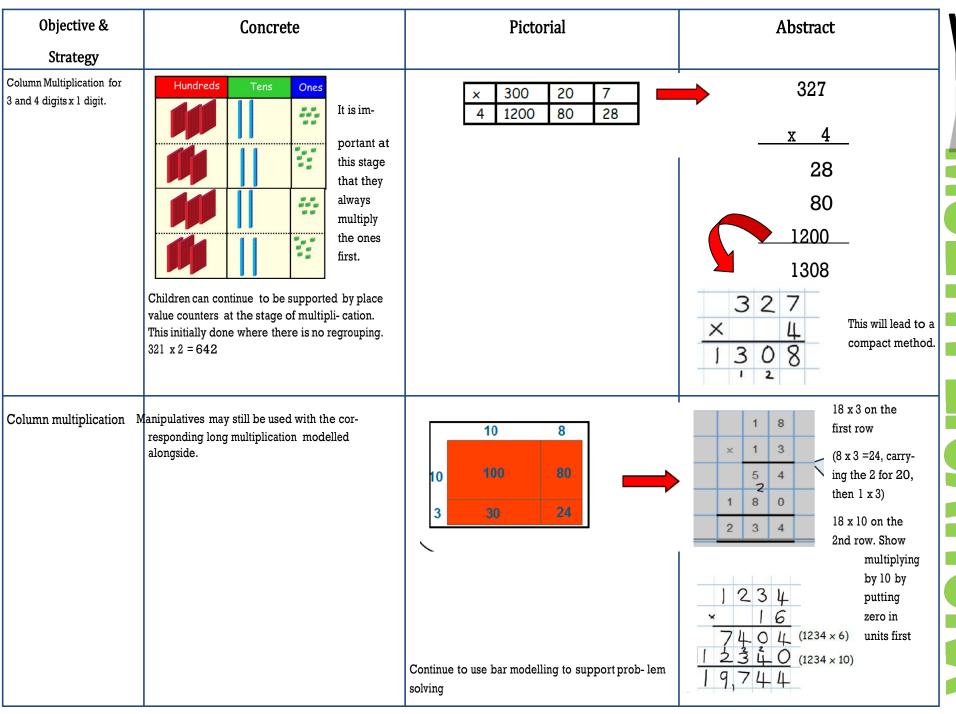

Moving forward, multiply by a 2 digit number showing the different rows within the grid method.

	10	8
10	100	80
3	30	24

Objective & Strategy	Concrete	Pictorial	Abstract

## **Pictorial**

Students can continue to use drawn diagrams with dots or circles to help them divide numbers into equal groups.

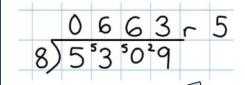

Encourage them to move towards counting in multiples to divide more efficiently.

## Abstract

Begin with divisions that divide equally with no remainder.

Move onto divisions with a remainder.

Finally move into decimal places to divide the total accurately.

041R1 4) 165

4 does not go into 1 (hundred). So combine the 1 hundred with the 6 tens (160).

4 goes into 16 four times.

4 goes into 5 once, leaving a remainder of 1.

th h t o 0 4 0 0 R? 8) 32 07

8 does not go into 3 of the thousands. So combine the 3 thousands with the 2 hundreds (3,200).

8 goes into 32 four times (3,200 + 8 = 400)

8 goes into 0 zero times (tens).

8 goes into 7 zero times, and leaves a remainder of 7.

Step 1 continued...

When dividing tile ones, 4 goes into 7 one time. Multiply 1 x 4 = 4, write that four under the 7, and subract. This finds us the remainder of 3.

Check:  $4 \times 61 + 3 = 247$ 

When dividing tile ones, 4 goes into 9 two times. Multiply 2  $\times$  4 = 8, write that eight under the 9, and subract. This finds us the remainder of 1

Check:  $4 \times 402 + 1 = 1,609$ 

## Step 2-a remainder in the tens

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
t o	t o	<b>t</b> 0
	2	29
	<u>2</u> ) 58	2)5
	4	:A_I
	1	1
Two goes into $\frac{1}{2}$ $\frac{1}{5}$ $\frac{1}{8}$ nes, or 5 tens + 2 = 2 whole tens but there is a remainder!	To find it, multiply 2 x 2 = 4, write that 4 under the five, and subtract to find the remainder of 1 ten.	Next, drop down the 8 of the ones next to the leftover 1 ten. You combine the remainder ten with 8 ones, and get 18.

1. Divide.	2. Multiply & subtract.	3. Drop down the next digit.
------------	-------------------------	------------------------------

St Mary's C.E. Primary School Calculation Policy

t o 29 ) 58 - 4 1 8

Divide 2 into 18. Place 9: into the quotient

t o 29 2)58 -4 1 8

Multiply 9 x 2 = 18, write that 18 under the 18, and subtract

9 2)58 -4 18 -18

The division is over since there are no more digits in the dividend. The quotient is 29.

Step 2-a remainder in any of the place values

1. Divide.	2. Multipy & subtract	3. Drop down the next digit.
<b>h</b> t o	2 f278 -2 0	h t o 18 2)278 -2 w
Two goes into 2 one time, or 2 hundreds.;. 2 = 1 ed.	Multiply 1 x 2 = 2, write that 2 under the Iwo, and subtract to lind Ihe remainder of zero.	Next, drop down the 7 of the tens next to the zero.
Divide.	Multiply & subtract.	Drop down the next digit.
h t o 1 3 2) 2 7 81 07  Divide 2 into 7. Place 3 into lhe quotient:	h 1 o 1 3 2 f 2 7 8 #.2. 0 **	h t o 1 3 2)27§ -2 07 6 18  Next, drop down the 8 of the ones next to the 1 leftover ten.
1. Divide.	2. Muttidy & subtract	3. Drop down the next digit.
139 2)278 -2 07 6	139 2 f278 -2 0 7 - 6	1 39 2) 278 -2 07 6 18 -18
Divide 2 into 18. Place 9 tnto lhe quotient	Multiply $9 \times 2 = 18$ , write that $18$ under Ifle $18$ , and subtract to find the remainder of zero.	There are no more digils to drop down. Ttte quotient is 139.

St Mary's C.E. Primary School Calculation Policy
